

46 01-D-09 Solar photovoltaic power generation system for carbon reduction action plan

Geographical conditions like abundant sunshine are of great natural advantage to development of solar photovoltaic applications in Taiwan. Besides, urban energy consumption increases so rapidly that it is very urgent to implement renewable energy and carbon reduction.

District affairs offices and household registration offices in Taichung are assisted in handling "the public tendering sale case of setting solar photovoltaic power generation system on public buildings roof in Taichung city ". Tatu District Affairs Office, Waipu District Affairs Office, Xinshe District Affairs Office, Fengyuan District Affairs Office, Tanzi District Affairs Office and Heping Household Registration Office have set solar photovoltaic power generation systems.
