

53 05-D-01 Replace the high-energy-consumption mercury lamps with energy-saving LED lights by degrees

In order to implement carbon reduction and solve problems for high-energy-consumption mercury lamps, we will replace the high-energy-consumption mercury lamps with energy-saving LED lights. 329 lights have been replaced in Wuqi district until 2015. According to the “Mercury lights Sunset Project” executed by Bureau of Energy, Ministry of Economic Affairs, it is expected that all high-energy-consumption lights in Taichung totaling 97,772 should have been replaced with LED lights until 2016 and we can achieve the goals of saving electricity consumption and environmental protection.
