

60 07-C-02 Create Urban Landscape - continue to conduct designed projects.

This plan base on the core concepts including environmental adaptation to climate change, the green infrastructure, transportation, industries with local characteristics, and environment-friendly space building. The authority proposed integrated proposals of the natural and cultural landscape which implement on park green area, public spaces, living hubs and squares in order to obtain maximum utilization efficiency of resource, and gradually achieve the goal of revitalizing city and countryside.
