

66 08-E-05 To prevent open burning of straw and reuse plan

1. The government offers grants that will assist farmers to process straw and reduce straw combustion which can beautify the rural environment and achieve the purpose of carbon reduction.
2. The farmers can find assistance to handle straw plowing and buried operations to prevent burning straw, or to reuse straw by way of compost or making into ropes, forages, fuels, straw mats, papers and other materials. It is expected to achieve the goals of zero-straw-combustion and biomass recycling.
