

77 17-A-02 Electricity generation at incineration plants plan

To provide more green energy and relieve the problem about power shortage, Wenshan, Houli and Wurih incineration plant utilize the thermal energy generated by burning garbage to generate electricity and supply it to Taiwan Power Company. The generation capacity in 2014 is 447,866 tons. The plan is not only solve the problem about waste treatment but also implement carbon reduction in incineration plants.
