

87 19-A-02 To encourage medical institutions and restaurant to reduce energy consumption and waste generation plan

1. To encourage the medical institutions (including nursing homes, long-term care centers) and pharmacy to improve the equipment of electricity and water utilization, provide shuttle bus to reduce energy consumption (from utilization of water, electricity and riding vehicles), and reduce the general medical waste to implement carbon reduction.

2. With the low-carbon certification of restaurant industry, we could encourage restaurants to reduce energy consumption (from water, electricity and food miles) and waste generation (including leftovers) to implement carbon reduction.
