

# Opportunities for students

Follow Greenest City 2020

## CityStudio Vancouver

CityStudio Vancouver is a hub and center for sustainability education.

The goal of CityStudio Vancouver is to directly involve students, professors, and universities in the implementation of Vancouver's Greenest City 2020 goals.

### About the CityStudio Vancouver program

Student cohorts target Vancouver's Greenest City goals, such as zero waste, climate leadership, access to nature and food security.

Through dialogue, community engagement, asset mapping, interorganizational collaboration and demonstration projects, students focus their knowledge and energy on implementing greenest city goals through coursework.

CityStudio Vancouver is an energetic hub of learning and leadership, where students design and implement Greenest City projects.

## UBC-City of Vancouver Greenest City Scholars Program

Each year, the UBC Sustainability Initiative (USI) sponsors ten graduate students enrolled in Masters or PhD programs at UBC Vancouver. These students work and gain experience on a sustainability research collaboration program with the City of Vancouver.

### How the program works

The USI provides individual grants to 10 successful candidates to work with the City in support of the Greenest City 2020 Action Plan.

Funding of \$5,000 per student is provided to complete 250 hours of work.

Each successful candidate works on one research project designed to contribute to the Greenest City Action Team's long-term goal.

### About the UBC Sustainability Initiative

The USI is a strategic management group that promotes and unites sustainability efforts in teaching and learning, research, and operations at UBC.

As part of this university-wide initiative, diverse groups - researchers, teachers, students, staff, campus leaders and external partners - come together to integrate efforts, to collaborate and to use the campus as a living laboratory for sustainability.
