

◆ Effects of Pollution:

Pollution Control Cell, TMC receives complaints about air, noise and water pollution. And Pollution Control Cell monitors these complaints and suggests the proper remedial measure to control the pollution. In the year 2012, pollution Control Cell, TMC received 40 complaints out of which 20 were related to air and water pollution, 15 related to Noise and other 5 complaints. Out of these 40 complaints 90% were resolved. There is major urbanization due to increasing population. The nos. of Hotels, malls, resorts is increasing day by day. People are facing problems due to smoke and smell emitting during preparation of food at these places. Pollution Control Cell gets adequate measures done to control the pollution from such establishments and resolve the people's complaints. For example provision of stack at commercial Sweet marts. There are differences between developer and Society members for operation of STP. Here Pollution Control Cell gives special attention and coordinates the issue with Developer and society members and starts operations of STP. In complaints about Noise Pollution, the main complaints are about noise during festivals, noise from Vehicles, DG sets at Malls and Residential Societies. About these complaints the noise pollution is reduced by giving special attention by Pollution Control Cell. Demand of electricity is increased due to growing urbanization which has resulted in Load Shedding. And during load shedding use of electricity generators has increased which is causing more air pollution. For these issues Pollution Control Cell has guided to establishments about pollution control measures.
