

11 Changing Decorating Lights in Taichung Shopping District into energy-saving lights

1. Changing the incandescent lights and halogen lights in Fengchia shopping district into energy-saving lights (saving 60-75% electricity). Adopt auto detecting illumination or daylight detecting switch in low-usage places (saving 30-90% electricity).
2. Assist shops and listed vendors in the shopping district to change to energy-saving lights gradually.
3. Changing street lights near Fengchia shopping district and inside Fengchia night market into energy saving lights. (ask Economic Affairs Bureau to assist the changing process.)
