

## 20 Reuse of Incinerator Bottom Slags

1. Three waste recycle plants (refuse incineration plants) in Houli, Wuri, Wenshan in Taichung City have 75,000 tons reusable bottom ashes each year.
2. Bottom ashes of the three recycling plants are outsourced to process and reuse. Qualified bottom ashes after reusing process can be used as graded aggregation base, base and terrace filling, controlled low strength material, non-reinforced concrete addition material, asphalt concrete addition material, and brick addition material.
