

30 Living Wastewater Recycle and Reuse Program

1. The Taichung Water Recycling Center will continue to function, process the domestic sewage, reduce pollutant emitted to the natural environment, and recycling reusable resources.
2. Estimate to process and recycle 70,000 CMD (25,550 thousand tons/year) every year, reducing 4.38t sludge every day (1600t/year), renewable methane saving 385 m³ natural gas usage every day (140,525m³/year).
