

THE WEST SWEDISH
Chemical Cluster

Triple helix collaboration

Four focus areas

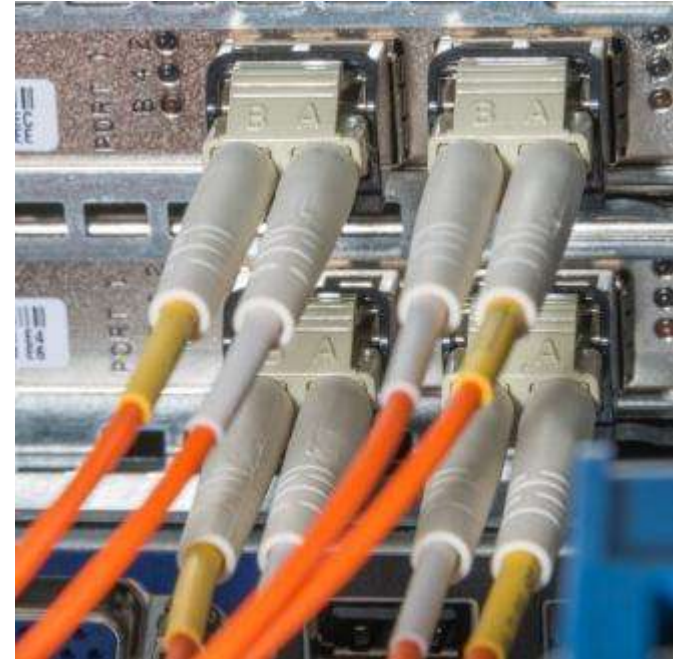

The cluster pursues issues and development projects linked to the following four focus areas:

- Renewable raw materials for chemical and material products as well as transport fuels
- Resource and energy efficiency
- Recycling
- Development and management of core competence

The Chemical Cluster offers

- Access to networks of actors from industry, academia/institutes and the public sector
- Opportunity to highlight and pursue issues that are important to the cluster's actors
- Opportunity to initiate and participate in projects that are important to the cluster's actors
- Network activities; seminars, workshops, conferences and dialogue meetings

Purpose

- Develop and strengthen cooperation between actors from industry, academia/institutes and the public sector
- Identify innovation and development projects in prioritised areas
- The cluster's strength lies in the cross connection of actors from the chemical, energy, recycling and forest industries

Objectives

The overall objective of the cluster is to contribute to fossil-fuel independence for Västra Götaland by 2030.

Another important objective is to strengthen the competitiveness among our regional companies.

Effects

- Sustainable growth
- Increased competitiveness
- New establishments and investments in the region

Projects/initiatives strongly linked to the Chemical Cluster

- Chemical Regions for Resource Efficiency, R4R
- West Swedish collaboration on surplus industrial heat
- Sustainable management of waste plastics from hospitals
- IS3 Horizon 2020/Waste 1
- An innovation infrastructure for Green chemistry and bio-based products
- Green chemistry and bio-based products
- BioSME
- Sustainable Chemistry 2030
- BioInnovation
- 4C – Collaborative Chemistry Cluster Case study

The organisation

Host organisation:
Business Region Göteborg

Cluster management:
Lars Josefsson, Hans Larsson and Sofia Börjesson

Steering committee:
Members of the cluster

Work groups:
Project-specific work groups

Members

A Member of
The Linde Group | **AGA**

CHALMERS

COWI

**INEOS
ChlorVinyls**
