

22. Wonju Car-free Day

○ Wonju Car-free Day

- With increasing challenges caused by global warming, the importance of environmentally solid and sustainable lifestyle promotion is being highlighted.
- In Wonju, energy emissions account for 88.7 percent of all greenhouse emissions, and 42.5 percent of energy emissions is caused by transportation. (per 2007 data from Basic Plans for Climate Change Response in Wonju)
- To this end, Car-Free Day is held September 22 every year to raise public awareness of transportation's importance and promote a green lifestyle through public transportation
